

My family and I listen to K-Love radio at home, in the car, and at work. I find that the family friendly music generates a positive mood and sets the tone for my work environment. I have had a number of people ask me what the station is and where they can find it on their stations. Co-workers and clients alike seem to enjoy hearing something other than negative and/or depressing lyrics that other stations play. It would be a profound loss for our community if this and other good stations like K-Love are forced off the airwaves. People have the constitutional right to listen to Christian music on the radio and not feel penalized simply because it is not the most "popular" station in the area. Please do not allow this to happen.
